Rob + Ryan

1. Most of our design is made of cotton cloth with the tentacles made of thin strips of cotton fabric. The filling is made of poly-fil. And the colors are all shown in our drawing.

2. We created the design because the tentacles will flow when there is zero gravity and they have stars on the tips. It also has a dark blue color, a sun and moon that represents space.

3. When it reaches zero gravity the tentacles and stars will flow.

4. It will represent the trip because it has many representations for space.
