

COMMEMORATING AMERICA’S FIRST SPACE STATION: SKYLAB

Tim Gagnon, portrait and graphic artist of Titusville, FL announces the release of this commemorative design the 7th in his series: “Celebrating 50 Years of America in Space.”

After the success of the Apollo Moon Program America’s attention in space exploration turned inward. Originally named the Apollo Applications Program, SKYLAB studied our Sun, our Earth and ourselves. Not just what it took to explore space but what it might take to live there. Three crews visited the orbiting complex in increasing ambitious missions between May, 1973 and February, 1974.

This will be an 8” in diameter partially embroidered patch. The black area is twill material to allow the mission art to be displayed as prominently as possible.

If interested, please complete the order form below & return with payment (U.S. funds only).
CURRENTLY TAKING PRE-ORDERS.

FOR RESIDENTS OF USA and CANADA:
